

## **BOHS P405 Management of Asbestos in Buildings** **Hybrid course (held virtually via Zoom & face-to-face in Glasgow)**

P405 – Management of Asbestos in Buildings (including Asbestos Removal) is the industry-standard qualification for those whose work involves asbestos management, such as duty holders, building managers, responsible persons, and those who look after asbestos management data. It provides the background knowledge required to manage identified asbestos in buildings and ensures that appropriate management processes are followed and documented properly. It also gives you the knowledge to make better procurement decisions, and to monitor the quality of the services provided by other asbestos professionals through understanding the standards and procedures that you should be following.

Before taking the qualification, candidates should have an awareness of the contents of The Control of Asbestos Regulations 2012 (in particular Regulation 4) and the supporting L143 Managing and working with asbestos Approved Code of Practice and guidance. They should also be familiar with the contents of HSG248 and HSG264.

Candidates are required to pass a written theory examination and written practical examination (which take place immediately after the course) to be awarded the qualification.

The qualification is structured into five sections

- Legislation
- Management of asbestos in buildings
- Asbestos remediation
- Role of laboratory/analysts
- Practical work.

For further information, [visit our website](#), where you can also download the BOHS course syllabus.
