

LIFT SAFETY MANAGEMENT

This information filled training session will provide those social housing colleagues who are responsible for the delivery of a lift servicing and maintenance provision, including passenger lifts, hoists, step-lifts, through-floor, lifts, platform lifts and stairlifts with all of the information that they need to not only understand legislative standards and guidance, but also ensure the delivery of their provision aligns with best practice requirements of the Health & Safety Executive (HSE).

This virtual training session is delivered 'live' by our knowledgeable and professional trainer and is interactive, encouraging delegate participation, to ensure skills learnt will be able to be confidently applied in practice; there will be ample time for delegates to ask questions throughout the session.

Learners will leave the session with a basic knowledge of relevant regulations, legislative responsibilities and requirements for the lift safety provision within their organisation and how they can manage this effectively and maintain robust records.

This training sessions provides all of the information you require to manage lift safety in your organisation and includes a look at the following aspects of the provision:

- A brief overview of the relevant regulations and legislative requirements for lift safety
- Duties on lift owners
- The types of lifting equipment that should be maintained and the frequency for doing so
- Servicing/Maintenance
- Thorough examinations (including records and what to check upon receipt)
- Competent contractors
- Dealing with defects and actions from either servicing or thorough examination
- Maintaining effective records for lift assets.
- Plant / Equipment not available
- LG1 - supplementary tests
- Record keeping

Conor Brown - Lift Safety Associate & Trainer

Conor is a highly experienced professional in the fields of vertical transportation and pressure systems inspection, compliance, and consultancy. With over a decade of hands-on experience, he has successfully delivered comprehensive services to a wide range of clients, including housing associations, NHS Boards, and private organisations across Scotland.

Conor's in-depth understanding of the Scottish housing sector enables him to provide tailored solutions to the unique challenges faced by the industry. From passenger lifts to biomass district heating solutions, he specialises in compliance, inspection, authorising engineer services, and risk assessments, ensuring client adherence to regulatory requirements and maintenance of high safety standards.
